MIRENCO's MDEP Analysis can help.

How efficient is your truck engine?

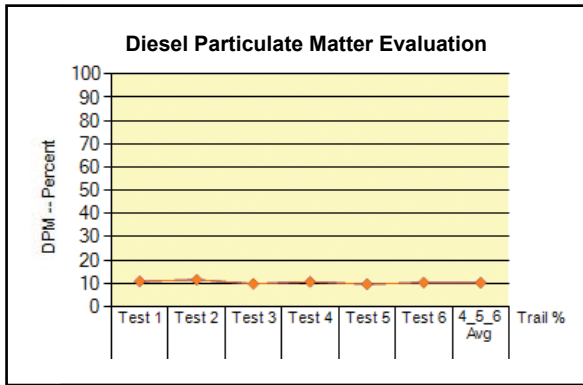

With Mirencos cutting edge MDEP Analysis, you can find out.

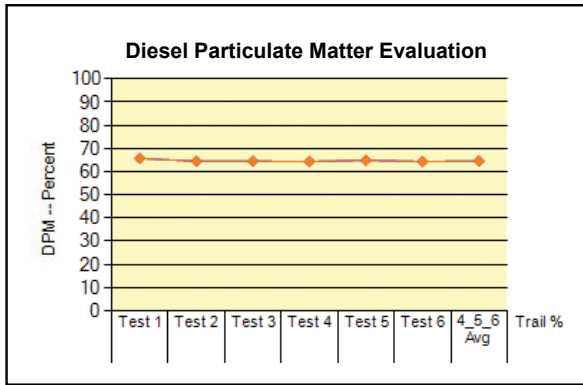

No matter what is under your hood!

GOOD FUEL COMBUSTION

POOR FUEL COMBUSTION

What is MDEP?

MDEP, or Mirenc Diesel Evaluation Procedure, is a service that analyzes your engine's exhaust to evaluate COMBUSTION EFFICIENCY. A graphical report details combustion efficiency and suggests engine repairs. Benefits include reduced fuel consumption, lower engine emissions, and extended engine life.

How many thousands of gallons of un-burnt fuel are going out your engine's exhaust stacks as Diesel Particulate Matter (DPM)?

**High DPMs = Over Fueling =
Black Smoke = High Emmissions =
Wasted Fuel**

MIRENCO

You Cannot Manage What You Cannot Measure

MDEP can identify:

Turbocharger Problems

Air Restriction

Valve Lash

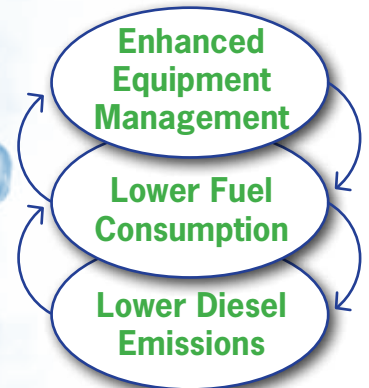

Injector Timing

Faulty Injectors

Air/Fuel Ratio

Faulty ECM Flash Files

Identifying and repairing these issues can lead to:

Keeping you efficient and ultimately saving you money.
